

Biographical Sketch

Lee Ambers, B.S., J.D.

Lee Ambers has been actively engaged in the establishment of heliports and a host of aviation related projects since 1975. His expertise and experience spans all phases of heliport development and aviation issues including analysis, investigations, incorporation of operational needs and minimizing expenses. Beginning in 1967, Mr. Ambers regularly interacted with governmental bodies, at all levels, in a variety of jurisdictions and regulatory agencies. He has and continues to represent various legislative and administrative projects to this day. He remains an active legislative advocate.

As a heliport consultant, Mr. Ambers places particular emphasis on safety, compliance and the functional ability of the project. The selection of a proper heliport site and flight path is the first step in the creation of a viable facility. Conceptual design includes consideration for the needs and concerns of the pilot, the proponent and the community. Special consideration is paid to construction and ongoing operational costs. Mr. Ambers continues to have special expertise in the governmental and community interaction which is necessary for a successful project.

Mr. Ambers has been instrumental in assisting various jurisdictions in the preparation of regulations, as relates to emergency landing facilities and the licensing of private and public heliports. Lee Ambers has worked with numerous internationally acclaimed architectural firms as their consultant. Additionally, he represents all aspects of aviation projects, encompassing a conglomeration of industries and heliport categories. Furthermore, Mr. Ambers has appeared as a guest speaker and panelist at numerous seminars and conventions. Mr. Ambers also appears as an expert witness in a assortment of aviation related cases.
